Data Center

I strongly oppose the data center being built in Inyokern, Ca. We do not have the water supply nor the energy infrastructure to support such a thing. Please leave our little desert town alone. Most citizens oppose this center being built. If this center is built it would ruin our town and pass the high water and energy cost into the local citizens of Inyokern and Ridgecrest, something most people out here can not afford. We have a unique environment which is fragile and this center will ruin the homes for so many living thing here. Stay out of Inyokern and Ridgecrest.
