## **No thank you**

I'm unsure why this is even up for consideration. The water in this area and the dark sky are my only concerns. One of the bonuses in living rural is the dark desert sky. With the increased restrictions on land use for recreation in our area, the sell off of land to Mojave Minerals for increased mining, and now the elimination of silence and dark skies, why would anyone want to live in the desert. This area is slowly turning into a wasteland. Additionally, the Navy Base already struggles to recruit a talented IT workforce, this will only exacerbate that problem. If simply creating jobs were the problem, we wouldn't have so many system administrator ads in the area. More than any other profession. You won't be adding jobs. We already can not fill those positions in this isolated part of California.
