No lithium battery storage facility

The proposed battery storage facility is a horrific suggestion. After the breathing issues and environmental travesty the elkhorn slough dwellers experienced with ongoing fires that no one knew how to put out it is absolutely disgusting that anyone living in Watsonville would subject our friends family wild animals and plants to this possibility. Our land has many excellent uses, battery storage is not for Watsonville. We are too important to the food production of our nation. We do not want any data centers, battery storage or detainment centers in our town. Period.
