## **No Data Center in IWV**

I am opposed to having a data center in our drought ridden valley. We do not need any more heat generating or water table depleting businesses and we can't afford to over draw water. Our group water co-op is already seeing our well water level drop and we are only a few miles from the data center location. This is bad for our town and our property values which are our main investments. No data center in IWV!
