ABSTRACT

This *Renewables Portfolio Standard 2021–2024 Retail Sellers Procurement Verification Staff Draft Report* presents California Energy Commission (CEC) staff’s findings on the amount of eligible renewable energy procured by retail sellers of electricity under California’s Renewables Portfolio Standard Program. The report presents findings for 50 retail sellers, which include investor-owned utilities (small, large, and multijurisdictional utilities), electric service providers, and community choice aggregators.

For each compliance period, results from the application of the verification analyses are issued separately for retail sellers and local publicly owned electric utilities. For retail sellers, the *Renewables Portfolio Standard 2021–2024 Retail Sellers Procurement Verification Staff Draft Report* will be adopted as a single report by the CEC at a regularly scheduled business meeting and subsequently transmitted to the California Public Utilities Commission to be used for its compliance and enforcement. For each local publicly owned electric utility, verification results will be issued in separate reports that are also adopted by the CEC at a regularly scheduled business meeting to be used for compliance and enforcement activities.

Keywords: Renewables Portfolio Standard, RPS, Renewable Energy Credits, RECs, retail sellers, certification, verification, compliance, generation, load-serving entities, local publicly owned electric utilities, POU, investor-owned utilities, electric service providers, multijurisdictional utilities, community choice aggregators, RPS Online System, Western Renewable Energy Generation Information System, WREGIS

EXECUTIVE SUMMARY

California's Renewables Portfolio Standard (RPS) program is a highly effective policy that requires California electric load serving entities to source a percentage of their total retail sales from RPS-certified renewable generation facilities. The *Renewables Portfolio Standard 2021–2024 Retail Sellers Procurement Verification Staff Draft Report* applies only to retail sellers, which include investor-owned utilities (large, small, and multijurisdictional), electric service providers, and community choice aggregators reporting claims for Compliance Period 4 (2021–2024). A total of 43 retail sellers reported RPS procurement claims during this Compliance Period 4. California Energy Commission (CEC) staff verified the eligibility of these claims for each year of the compliance period. Staff communicated with retail sellers who sought to identify and resolve discrepancies in the data reported. Retail sellers had the option to dispute findings and submit additional supporting documentation or correct submitted reports, as needed, or to accept staff's draft findings. This report also includes the seven retail sellers that are registered but did not serve load.

Established in 2002, California's RPS is one of the nation's most ambitious renewable energy policies. Enacted by Senate Bill 1078 (Sher, Chapter 516, Statutes of 2002) and accelerated and expanded by subsequent legislation, California's RPS establishes increasingly progressive renewable energy procurement targets for the state's load-serving entities. Originally applicable to retail sellers, the statewide mandatory RPS was expanded by Senate Bill X1-2 (Simitian, Chapter 1, Statutes of 2011, First Extraordinary Session) to include local publicly owned electric utilities starting in 2011. Senate Bill 100 (De León, Chapter 312, Statutes of 2018) required load-serving entities to increase their procurement of eligible renewable energy resources to 60 percent of retail sales by 2030.

The CEC's *Renewables Portfolio Standard 2021–2024 Retail Sellers Procurement Verification Commission Staff Draft Report* is prepared to verify findings of retail sellers' procurement claims eligibility to the California Public Utilities Commission (CPUC) and the public, consistent with the CEC's duties under Public Utilities Code Section 399.25. After the CEC adopts the findings as presented in this *Renewables Portfolio Standard 2021–2024 Retail Sellers Procurement Verification Commission Staff Draft Report*, a final report will be transmitted to the CPUC.

The eligible procurement claims identified in this report were from RPS-certified facilities with sufficient generation to cover the procurement amounts claimed. CEC staff finds the procurement claim amounts listed in this report eligible for the RPS. Staff recommend that the procurement claim amounts count toward meeting the retail sellers' RPS obligations for Compliance Period 4 if found by the CPUC to be consistent with RPS rules for retail sellers.

CHAPTER 1:

Renewables Portfolio Standard

Background

The enactment of Senate Bill (SB) 1078 (Sher, Chapter 516, Statutes of 2002) in September 2002 created California's Renewables Portfolio Standard (RPS) program. California's RPS establishes increasingly progressive renewable energy procurement targets for the state's load-serving entities (LSEs). Originally applicable only to retail sellers, the statewide mandatory RPS was expanded by Senate Bill X1-2 (Simitian, Chapter 1, Statutes of 2011, First Extraordinary Session) to include local publicly owned electric utilities (POUs) starting in 2011. Senate Bill 100 (De León, Chapter 312, Statutes of 2018) increased the procurement targets, requiring both retail sellers and POUs to increase their procurement of eligible renewable energy resources to 60 percent of retail sales by 2030. This 60 percent procurement mandate supports California's goal of 100 percent clean electricity by 2045, following Senate Bill 100.

California's RPS is jointly administered and implemented by the California Energy Commission (CEC) and the California Public Utilities Commission (CPUC). As part of its responsibilities, Public Utilities Code Section 399.25 generally directs the CEC to:

- 1) certify eligible renewable energy resources
- 2) verify the eligibility of renewable energy procured by LSEs
- 3) design and implement an accounting system to track and report renewable energy procurement for all program participants
- 4) oversee compliance and enforcement of the POUs.

The CPUC is responsible for overseeing RPS compliance and enforcement for retail sellers.

Report Overview

This *Renewables Portfolio Standard 2021-2024 Retail Sellers Procurement Verification Commission Staff Draft Report* provides the results of CEC staff's verification and analysis of RPS claims submitted by retail sellers for Compliance Period 4 (CP 4) of the RPS. CP 4 covered 2021 through 2024, as specified for retail sellers in Public Utilities Code Section 399.15(b)(1)(D). This report includes the total eligible, ineligible, or withdrawn procurement claims by retail sellers and by resource type. Appendix A of this report provides LSE Summary Claims Reports in alphabetical order.

Following the adoption of this report at a regularly scheduled CEC business meeting, staff will transmit the final adopted *Renewables Portfolio Standard 2021-2024 Retail Sellers Procurement Verification* report to the CPUC to use in determining compliance with the RPS requirements. The results contained in this report will be considered final by the CEC once adopted. Accordingly, retail sellers should take care to review this report closely and identify any errors or requested revisions to the report not previously identified.

As stated, this report applies to retail sellers, which includes three large investor-owned utilities (IOU), three small and multijurisdictional utilities (SMJU), 17 electric service providers (ESP), and 27 community choice aggregators (CCA) that served electricity customer loads during CP 4 (**Table 1**).

CHAPTER 2:

Verification Method

As part of its administrative responsibility, the CEC verifies the RPS procurement claims of both retail sellers and POUs. The methods used by the CEC to verify generation reported by RPS-certified facilities and procurement claims submitted by RPS program participants are generally described in the *Renewables Portfolio Standard Eligibility Guidebook (RPS Eligibility Guidebook)* and further detailed in the *Renewables Portfolio Standard Verification and Compliance Methodology Report, Fourth Edition (Methodology Report)*. [Both documents](http://www.energy.ca.gov/portfolio/documents/rps_verification.html) are found at http://www.energy.ca.gov/portfolio/documents/rps_verification.html.

For this report, the terms “renewable energy credit,” and “procurement claim” all refer to a claim submitted to the CEC by a retail seller for an amount of electricity or electricity products from a specific RPS-certified generation facility.

As of January 1, 2014, all procurement claims must be reported using the Western Renewable Energy Generation Information System (WREGIS), except for claims that meet the requirements specified in the *RPS Eligibility Guidebook* to be reported directly to the CEC as WREGIS Adjustments.

CEC staff completes only the verification analysis described in Chapter 2, RPS Claims Eligibility of the *Methodology Report* for procurement claims reported by retail sellers. The following actions have been completed for verification of retail sellers’ procurement claims for CP 4:

- Verification of the RPS eligibility of the renewable energy facilities from which each reporting retail seller is claiming procurement.
- Verification that the total amount of renewable electricity procurement claimed matches or does not exceed the generation from each eligible facility.
- Determination that the amount of renewable electricity procured from each multifuel facility or biomethane facility matches the eligible amount of renewable generation, as established in the *RPS Eligibility Guidebook*.
- Verification that procurement exclusively serves California’s RPS and is not double counted for another renewable energy regulatory or market program.
- Identification of eligible, ineligible, and withdrawn procurement claims for each retail seller.
- Determination of the total amount of eligible procurement for each year and the overall compliance period.

For CP 4, CEC staff additionally conducted a 36-month renewable energy credit (REC) retirement requirement analysis for retail sellers. The CEC’s 36-month REC retirement verification for retail sellers was completed under retirement rules codified in Public Utilities

Code Section 399.21(a)(7) and further defined in CPUC Decision 12-06-038.¹ Claims that did not meet the criteria of the retirement rules were flagged as not meeting the 36-month retirement requirement. The CPUC is responsible for determining retail sellers' RPS compliance; the CEC does not evaluate whether retail sellers met their RPS procurement requirements.

¹ The CPUC's REC retirement rules are defined and found under [Decision 12-06-038](http://docs.cpuc.ca.gov/WORD_PDF/FINAL_DECISION/169704.pdf), http://docs.cpuc.ca.gov/WORD_PDF/FINAL_DECISION/169704.pdf.

CHAPTER 3:

Verification Results

This chapter presents procurement verification findings for fifty retail sellers subject to California's RPS requirements for CP 4 (2021–2024). Forty-three retail sellers served electricity customer loads and reported procurement claims for this compliance period. Seven retail sellers did not report procurement claims due to either no longer serving load or not planning to serve load in Compliance Period 4; however, they were still registered as retail sellers with the CPUC at the time of this report.

CEC staff verified 37,601 claims and 61,268,660 RECs for 2021; 27,340 claims and 79,282,785 RECs for 2022; 68,452 claims and 64,068,856 RECs for 2023; and 93,084 claims and 115,631,744 RECs for 2024. The tables in the following pages represent the verification findings for each retail seller grouped in the following categories. The number of entities in each category is also noted:

- Investor-Owned Utilities (3)
- Small and Multijurisdictional Utilities (3)
- Electric Service Providers (17)
- Community Choice Aggregators (27)

The summary results include amounts for each of the following:

- Total RPS claims reported (2021–2024)
- Ineligible claims, distinguished by the reason for the ineligible finding
- Withdrawn claims
- Claims eligible toward the RPS

The source for all data presented in the summary tables is the RPS staff analysis of each identified retail sellers' WREGIS Reports for years 2021, 2022, 2023, and 2024.

Table 12: Commercial Energy of California Summary of RPS Claims

Overview of RPS Claims (MWh):	
Total RPS Claims Reported	984,799
Ineligible Claims:	
Amount ineligible because facility was not RPS-certified when RECs were created	
Amount ineligible because the RECs were retired more than 36 months after the vintage	
Amount ineligible due to double claiming of RECs	
Amount ineligible because facility exceeded fossil fuel usage limit or used ineligible fuel	
Amount ineligible because generation was not reported through WREGIS	
Amount ineligible because the facility's generation report was not submitted	
Amount ineligible because claim exceeded the facility's allowable generation	
Amount ineligible because RECs were retired in a compliance period that began after the date of retirement	
Amount ineligible because RECs were retired in a compliance period preceding the vintage	
Amount ineligible because RECs were retired in a compliance period preceding the date of procurement	
Withdrawn Claims:	
Amount withdrawn by LSE	
Claims Eligible Toward the RPS	984,799

CHAPTER 4:

RPS Eligible Procurement Analysis

Advancing the use and availability of renewable energy is critical to achieving California's ambitious climate change goals. Increasing the diversity and balance of California's energy mix is an important goal of the RPS program.² To evaluate the success of the RPS program in supporting a diverse mix of facilities, CEC staff analyzed retail sellers' procurement by resource type of the facilities represented in RPS procurement claims. This analysis, presented in **Error! Reference source not found.52** below, shows the amount of eligible renewable energy claimed by each renewable resource by each year of the compliance period. It also lists the totals reported for each renewable resource during CP 1, CP 2, CP 3, and CP 4.

The amounts are provided separately for the three major IOUs in the state, the small and multijurisdictional IOUs, ESPs, and CCAs. Only those resource types for which claims were submitted are shown. For the analysis of RPS-eligible procurement by resource type, generation claimed in a year other than the year generated is included with the resource type for the year claimed, not the year generated.

The percentage of different resource types procured by year for retail sellers, including IOUs, SMJUs, ESPs, and CCAs, is presented in **Figure 1. Figure 2** shows the total procurement of each resource type by retail sellers for CP 4.

As the data and figures illustrate, retail sellers used a diverse renewable resource mix to satisfy RPS requirements during CP 4. The total amount of renewable energy generated and reported continues to increase every compliance period. In CP 4, photovoltaic was the most used resource type, overtaking wind.

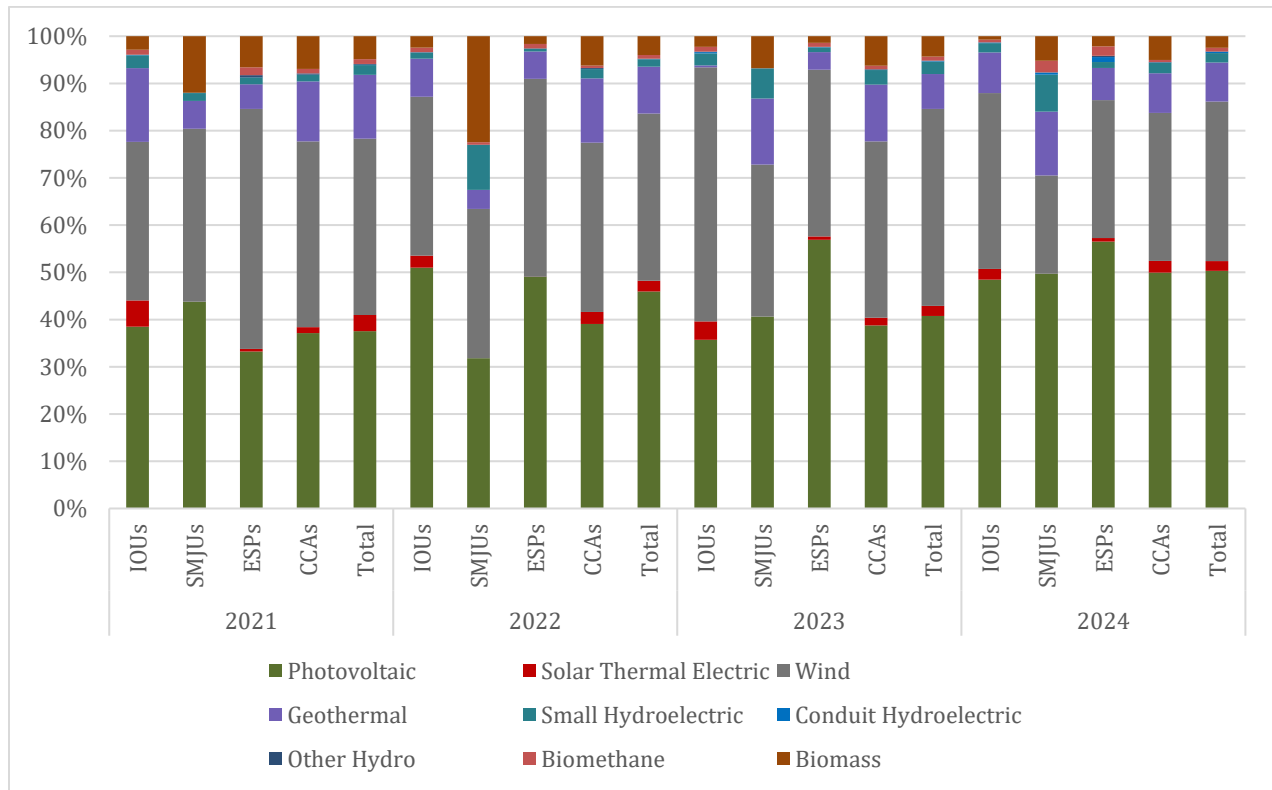

² Public Utilities Code Section 399.11.

Table 52: RPS-Eligible Procurement Reported for Compliance Period 4 for Retail Sellers (MWh)

Compliance Year	LSE Type	Photovoltaic	Solar Thermal Electric	Wind	Geothermal	Small Hydroelectric	Conduit Hydroelectric	Other Hydro	Biomethane	Biomass	Total Renewable Sources

GLOSSARY

CCA	— Community choice aggregator — As defined in Public Utilities Code Section 331.1, a <i>community choice aggregator</i> refers to any of the following entities, if that entity is not within the jurisdiction of a local publicly owned electric utility that provided electrical service as of January 1, 2003: any city, county, or city and county whose governing board elects to combine the loads of its residents, businesses, and municipal facilities in a communitywide electricity buyers' program or any group of cities, counties, or cities and counties whose governing boards have elected to combine the loads of their programs, through the formation of a joint powers agency established under Chapter 5 (commencing with Section 6500) of Division 7 of Title 1 of the Government Code.
CEC	California Energy Commission — State Energy Resources Conservation and Development Commission. Also referred to as the Energy Commission.
CP	— Compliance period — as defined in Public Utilities Code Section 399.15 (b), this is the period in which each retail seller shall procure a minimum quantity of eligible renewable energy resources under the RPS.
CPUC	— California Public Utilities Commission — an agency that regulates services and utilities in California, including electric power, telecommunications, natural gas, and water utilities.
ESP	— Electric service provider – as defined in Public Utilities Code Section 218.3, refers to an entity that offers electrical service to customers within the service territory of an electrical corporation but does not include an entity that offers electrical service solely to service customer load consistent with Public Utilities Code Section 218 (b) and does not include an electrical corporation or a public agency that offers electrical service to residential and small commercial customers within its jurisdiction or within the service territory of a local publicly owned electric utility. An ESP includes the unregulated affiliates and subsidiaries of an electrical corporation.
IOU	— Investor-owned utility — an electrical corporation as defined by Public Utilities Code Section 218. For this RPS verification report, this definition includes Pacific Gas and Electric Company, Southern California Edison Company, and San Diego Gas & Electric Company.
LSE	— Load-serving entity — an entity that provides electric service to end users and includes retail sellers, local publicly owned electric utilities, and other entities serving retail sales of electricity in California.
MWh	— Megawatt-hour —a unit of energy equivalent to 1 megawatt of electricity supplied for 1 hour.

PG&E	— Pacific Gas and Electric Company — a California IOU that operates in the northern two-thirds of California. PG&E has reported renewable energy procurement to the RPS program since 2001.
POU	— Local publicly owned electric utility — as defined by Public Utilities Code Section 224.3, a municipality or municipal corporation operating as a "public utility" furnishing electric service as provided in Section 10001 of the Public Utilities Code, a municipal utility district furnishing electric service formed under to Division 6 (commencing with Section 11501 of the Public Utilities Code), a public utility district furnishing electric services formed under the Public Utility District Act set forth in Division 7 (commencing with Section 15501 of the Public Utilities Code), an irrigation district furnishing electric services formed under the Irrigation District Law set forth in Division 11 (commencing with Section 20500) of the Water Code, or a joint powers authority that includes one or more of these agencies and that owns generation or transmission facilities, or furnishes electric services over its owners' or its members' electric distribution system.
REC	— Renewable Energy Credit/Certificate — defined in Public Utilities Code Section 399.12 (h), to mean a certificate of proof, issued through the accounting system established by the CEC under Section 399.25, that one unit of electricity was generated and delivered by an eligible renewable energy resource.
RPS	— Renewables Portfolio Standard — California's Renewables Portfolio Standard as established in Public Utilities Code Section 399.11, et seq. and defined in Public Utilities Code Section 399.12 (i), to mean the specified percentage of electricity generated by eligible renewable energy resources that a retail seller or local publicly owned electric utility is required to procure under Public Utilities Code section 399.11 et seq.
SB	— Senate Bill — legislation that originates in the California State Senate.
SCE	— Southern California Edison Company — a California IOU that is the primary electricity supply company for much of Southern California. SCE has reported renewable energy procurement to the RPS program since 2001.
SDG&E	— San Diego Gas & Electric Company — a California IOU that provides natural gas and electricity to San Diego County and southern Orange County. SDG&E has reported renewable energy procurement to the RPS program since 2001.
SMJU	— Small and multijurisdictional utilities refer collectively to small electrical corporations that meet the requirements of Public Utilities Code Section 399.18 and MJUs that meet the requirements of Public Utilities Code Section 399.17. This definition includes Bear Valley Electric Service, Inc., Liberty Utilities LLC (CalPeco Electric), and PacifiCorp.

- WECC — Western Electricity Coordinating Council means the electricity coordinating council as defined in Public Utilities Code Section 399.12 (k). WECC is part of the North American Electric Reliability Corporation and the regional entity responsible for coordinating and promoting bulk electric system reliability and security in the Western Interconnection serving all or part of the 14 states and portions of Mexico (northern Baja California) and Canada (British Columbia and Alberta).
- WREGIS — Western Renewable Energy Generation Information System is an independent renewable energy tracking system implemented for the region covered by the WECC and operated by WECC employees.

APPENDIX A:

Retail Sellers' Summary Claims Reports

Appendix A provides retail sellers' Summary Claims Reports (SCR), based on the retail sellers' 2021-2024 RPS procurement claims reported through WREGIS reports. The SCRs are listed in alphabetical order, and the findings are provided in the same template for all entities. Each SCR contains the following information:

1. Reporting Year – The year for which the generation claimed was retired for the RPS.
2. CEC RPS ID – RPS Certification identification number assigned to the generating facility during the RPS certification process.
3. Facility Name – The facility name provided to the CEC by the applicant when applying for certification.
4. Resource Type – The primary renewable resource type provided by the applicant when applying for RPS certification.
5. Vintage Year – The year that the generation claimed was generated.
6. Claim Submitted (MWh) – The amount of procurement reflected in a claim retired through WREGIS and reported to the CEC in a WREGIS Report.
7. Amount Ineligible or Withdrawn (MWh) – Total ineligible or withdrawn amounts from each claim determined during verification.
