Subject: Skylight Law Changes

Mazi Shirakh  
California Energy Commission

My name is Rick Troutner and I am a general contractor that has paid for specialized training to become a Velux 5-Star skylight installer. I have also committed resources to become a Velux skylight dealer with a territory in NorthernCalifornia.

My business is now primarily old skylight replacement and new skylight installations.

Your proposed changes in the current laws regarding Title 24, part 6 skylight U-Factors and SHGU along with maximum sizes will cripple mine and every other dealer/installer in California. It would render all skylight inventory in California non-compliant and un- installable thus eliminating the majority of my business and the skylight industry in California.

Please consider the impact that eliminating an entire industry will have on the economy and on the construction trades that will be effected.

Thank you.
