Sales technical Support

RENON POWER appreciates the California Energy Commission's efforts to update and improve the Solar Equipment Lists program.

We support maintaining accurate product listings and clear certification requirements. For any products that may be moved to an archive list due to certification or documentation issues, we respectfully recommend that CEC provide prior notice to the manufacturer and allow a reasonable correction period before taking action.

This process would help ensure listing accuracy while also giving manufacturers a fair opportunity to update records, renew certifications, or clarify documentation.

Thank you for the opportunity to provide comments.
