Reject Data Center in Inyokern

Hello,

I feel this should go without saying. But the Inyokern/Ridgecrest area are already dried up. We're losing water to a pistachio farm. We already deal with noise from the Navy base. The last thing we need is an incredibly thirsty, noisy data center that doesn't provide any long term benefit for residents. Our water and energy bills go up every year. It's getting harder to stay. Please don't allow this data center to move forward and damage the residents or or natural area.
