CEC RFI: SOLAR EQUIPMENT LISTS GUIDELINES UPDATE (DOCKET 26-SOLAR-01)

Question 1: Should the CEC continue making the calculated value for the Photovoltaics for Utility Scale Applications (PVUSA) Test Conditions (PTC) rating of a PV module available?

We have no comments related to this question.

Question 2: When staff identify equipment on the SEL that does not have a current Certificate of Compliance, should the equipment be moved to an archive list without notifying the manufacturer?

We would recommend that equipment should not be moved to an archive list without first notifying the manufacturer and providing them with a reasonable period to revise their certification(s) before commencement of any action. This would help maintain listing accuracy and provide manufacturers with a window to work within to renew certifications and fix any other issues that might have arisen with their listings.
