STOP BUILDING DATA CENTERS!!!!

THIS NEEDS TO STOP!!! Data centers all around the country have proven to be bad for the environment. It makes drinking water undrinkable, and the air quality worse. Hayward used to have one of the cleanest drinking water reserves in the Bay Area, and now we're going to destroy that so people can generate pictures of other people or avoid using their brains to complete a homework assignment?? This isn't even an exaggeration. In March 2026, there was a hearing by the U.S. House Subcommittee on Oversight and Investigations into the EPA, where two jars of "drinking water" were shown to be completely contaminated near a Meta Data Center in Georgia. This is not the future I want for my son. This is not the future I want for anyone. Everyone deserves clean drinking water and clean air to breathe. STOP BEING A PART OF THE PROBLEM!!!!
