## **Replacement Tire Efficiency Program**

I have read the documents and find them to be a government agency's strong arm legalistic tactic to remove tire choices from the public market place.

I see this as a solution in search of the criteria to justify itself.

I chose products based on where they meet my criteria and have a proven track record of safety.

The wording of the proposed legislation removes that choice.

It will force me to accept a specific criteria for a replacement tire, without any other options, that may well not meet my specific needs.

The purpose of aftermarket tire options are to meet the needs of customers.

The other problem I have with the proposed legislation is, it in effect shuts down an industry for no other reason that it is not what their "Casper Milk Toast" approach to driving demands.

I will contact my legislators with my opposition to this legalistic strong arm proposal.
