Zero Carbon Modular Housing

The Future Organization, LLC is a boutique consultancy working at the intersection of nonprofits, government, and communities. Having worked across housing, homelessness, residential care for vulnerable populations, community development, and disaster/fire recovery, it is critical to enable widespread adoption of affordable, energy-efficient solutions. To this end, EPIC 5 should prioritize zero-carbon modular housing as a scalable clean-energy deployment platform, including solar, batteries, heat pumps, all-electric systems, resilience, affordability, and streamlined, cost-effective housing delivery. Our State cannot meet energy or housing affordability goals without public agency support that promotes ease of adoption of this solution in the marketplace.
