Bess in Acton,CA

As I was unable to attend the open house on Tuesday the 17th of June,I still would like to voice my concerns. We are a small rural town. The majority of homes are on private wells. We have children,animals,gardens and we love the peace and quiet. There are far too many examples of battery storage facilities burning, polluting the air and ground water for this installation to be acceptable. You have no long term studies(20 to 30 years) to show that there would be no later repercussions from this installation. Acton does not want to be the next Hinkley. We do not want our children, our animals, our water poisoned,our air polluted. We are an extremely high fire danger area. One out of control fire at your station would be disastrous. As far as I can see, your station here in Acton, does not have one redeeming quality to it. No BESS in Acton! Jan Dally
