No Bess please

I am concerned that such a project does not belong in our rural community. It would be very irresponsible to place this facility close to residential areas. I'm not that close personally, but know many families this would affect. The hazards are just too high for this area. Fire is a year round threat here. We have enough worries with drought conditions, wild fires and flooding when it does decide to rain. We are a small town that does not want or need this kind of hazardous material near our homes or schools.
