Totally against this project

I believe placing this project in an area prone to brush fires is absolutely out of the question and can not understand how this project has gotten approval thus far.

Our fire insurance has been canceled 3x in the last 5 years, how can this project be safe in such a community where it is difficult to get fire insurance because of the increased incidence of fires.

If the facility/batteries catch on fire our community will be devastated all for the greed of a company wanting to place this facility close to the electricity plant. Put it out in the middle of the desert, away from people if it is really necessary.
