Battery Storage Facility in the Interlaken District

This proposed facility is a very real threat to our entire county. Most of us living in Santa Cruz County live here because we want "green", renewable energy not fossil fuel and the pollution it brings. This proposed battery storage facility is unfortunately, not "green" energy, it is "greed" energy. We just experienced a disaster for the entire central coast with the fire at the battery storage facility at Moss Landing

The place where the developer, Seahawk Energy from Massachusetts, is producing apple orchard situated directly above College Lake. This area is designated as prime agricultural land. The land is supposed to be protected under Measure J, voted in by our citizens in 1978. Going forward with this facility is an assault on our community and our well-being. Please do not approve.
