## **Please STOP the Vaca Dixon Power Center!**

Please do not allow the Vaca Dixon battery storage project to proceed. The existing battery facilities have caused immeasurable harm to their local environments: polluting soil, air, and water when they catch fire and burn out of control. Moving is not an option for us, and we don't to live near such a dangerous facility. If this proceeds, our property values will plummet because our neighborhood will no longer be a desirable area to live. There are other ways to solve the energy challenges. These battery storage facilities come with risks that are too high. Please put a stop to it.
