Against New Large Scale Battery Storage Facility in Vacaville

I oppose this proposal. Large scale lithium ion storage facilities pose a large risk and require specialized tactics to combat incidental fires. The city of Vacaville has recently made budget cuts to local fire responders, so this would be a poor choice.

Health hazards are also severe for those in the area in the event of a fire. A better solution would be to move away from private ownership trying to make profit and support smaller local battery storage for households and businesses with solar.
