Re: 2013 Title 24 Building Energy Efficiency Standards/Adoption of 15-Day Language for the 2013 Energy Efficiency Building Standards: Comments of Pacific Gas and Electric Company

PG&E is a strong supporter of codes and standards as a vital tool in helping California achieve its clean energy goals. The California Energy Commission’s work on building standards is integral to California’s long-standing leadership in energy efficiency, and the Energy Commission’s efforts to continually improve the building energy efficiency standards are crucial to maintaining this leadership.

The building standards adopted today, which represent a balancing of many interests, are a cost-effective way to help customers save money on their energy bills and reduce greenhouse gas emissions. PG&E looks forward to working collaboratively with parties on the next cycle of Title 24 building efficiency standards.

Sincerely,

/s/

Valerie J. Winn
