Seahawk BESS, as of 7-4-26

This isn't 1906.

We have stopped siting concentrated industry and power next to people's homes.

The landscape is hilly, with wetlands all around it and a half billion in agriculture at risk, just a stone's throw away.

The road infrastructure is ancient unlined two-lane.

As an environmentalist, I want battery storage that is dispersed. Not concentrated. It must be sited amongst the community that will receive the energy. Bury a battery in a vault in each neighborhood. Share the risk. Contain the failure.
