Docket Number: 22-RENEW-01

Mobile Power Unit Eligibility

A valuable resource to charge zero emission vehicles for public chargers is mobile charging power units (XoS hub). As a public agency that must comply with the Advanced Clean Fleets Rule, Metropolitan is committed to transitioning its fleet to ZEVs. However, building the infrastructure throughout our Southern California service area is a long-term capital project and these charging units provide interim charging while the permanent project is being built out. Including these charging units in the grant is a necessity.
