Gabel Energy's Comments on 2028 Presentationâ€™ Nonresidential PV & Battery Updates

Thank you for the clarifying presentation. Attached is a letter with Gabel Energy's comments on the presentation.

Additional submitted attachment is included below.

July 17, 2026

To CEC Staff,

Topic: Session – 6/23/26 Nonresidential PV & Battery

After attending the pre-rulemaking staff workshop on the 2028 Energy Code on Day 1 (6/23/26), I have the following concerns:

After attending the pre-rulemaking staff workshop on the 2028 Energy Code on Day 1 (6/23/26). Since the proposed 2028 Energy Code language was not provided for the public to review and comment, it is difficult to understand how the metrics supported in this session will change the Energy Code requirements. Seeing the proposed language at the 45-day for the first time, is often too late to provide insightful and construction feedback on the understanding, application, and enforceability of the proposed code requirements. We request that this language be provided for the public ASAP for constructive stakeholder feedback. Please feel free to reach out if you have any questions or require clarification regarding the matters raised in this filing.

Please feel free to reach out if you have any questions or require clarification regarding the matters raised in this filing.

Sincerely,
