Corby battery energy storage project

I oppose the Corby project because it would place a battery energy storage system (BESS) on valuable agricultural land while introducing unnecessary public safety risks. Recent battery storage fires, including the well-publicized incident at Moss Landing, have demonstrated the potential for fires, toxic smoke, and difficult emergency response. Productive farmland should be preserved for agriculture, not converted to industrial battery storage. Until these safety concerns are fully addressed and a more appropriate location is identified, I do not support this project.
