concerned citizen

Good Morning

I would like to express my concern regarding the Corby Battery Energy Storage Project that is proposed for Vacaville Ca. I live in Dixon but on edge closet to Vacaville, I work in Vacaville and I have several family members who live in Vacaville including my parents who have severe health issues. I would like to strongly urge you to not approve this project to be built or move forward. I am concerned as well as many other residents, community leaders and county commissioners, political leaders, and police if this facility is allowed to be built. there is many concerns regarding the safety of our land and water in surrounding areas, concern regarding traffic and ability to evacuate safely if there is an emergency related to this project or near by that could effect this project, there is concerns in regards to the long term effects this will have on our community. I am asking that you please listen and take head to these concerns and stop this project from moving forward. Thank you
