Environmental and Economic Security Concerns

As a rancher employing active carbon sequestration projects on my property, I am highly concerned about the impact to my water supply. I primarily depend on well water and access the Solano Irrigation District water for supporting grazing and silvopastures. I am concerned about groundwater depletion, chemical/metals leeching and environmental hazards that will impact my animals and family. Solano county has rich, agricultural benefits and any reduction in ability to produce food and regenerate soil and water health should not be permitted. Even assuming there isn't an "accidental" fire, my future business, the health of my animals and family depend on clean and accessible water. Please provide evidence as to how this project will impact my environmental and economic security within 2 miles of the proposed facility.
