Oppose Corby Battery Energy Storage Project

I strongly oppose the construction and operation of the Corby Battery Storage Project, The location places thousands of people in danger when it malfunctions, as other such storage facilities have, and places the land and homes in danger of fire in a region already prone to fire.

The fact that it will be unmanned and operated remotely is of great concern to me because it increases the likelihood that problems will not be detected in time to prevent problems or will go undetected particularly if the systems used to remotely manage it are affected by cyberattack, solar storm effects, or other damage.

It does not create jobs for our community, does not assist the community in any way but instead increases the likelihood of danger and harm. Please do NOT approve this project. P
