Docket number 24-OIR-03 - Energy Data Collection - Phase 3

Commissioners re: Docket 24-OIR-03,

Iâ€™m a CA-based contractor in Sacramento and this would cause harm to our industry. It will continue to add costs on the front end and back end that just arenâ€™t helpful to anyone but create more government road blocks and bureaucracy. And most government programs are poorly run and are incredibly inefficient and inept. This would increase burden/costs because it creates more bureaucracy on top of the other measurements already required to run a business and stay in compliance. A better approach would be to leave well enough alone. Or create incentives for folks. This proposal will not solve the permit compliance issue because there will always be ways for people to go around rules. Marie Goodwin
