RE: Support for RB Inyokern Data Center — Docket No. 26-SPPE-01

Dear Chair and Commissioners:

My name is Frederick Viszneki. I am a journeymen Ironworker working in the Ironworkers Union Local 433 for the past 45 years. I am a United States Retired Navy Veteran and have lived in California City for the past fifteen years. I have three grown children and nine grandchildren that reside in Kern Counties.

I am writing this letter in support of project - RB INYOKERN DATA CENTER DOCKET NO. SPPE-01.

The importance of this project is very vital to the growth and development of California. This project will generate good paying jobs and significant tax revenue for Kern County. A large-scale infrastructure built with a union workforce, putting our apprentices and tomorrow's journeymen to work. R&L Capital has signed agreements with the States Building and Construction Trades Council, Kern, Inyo, and Mono Counties committing that this project will be built under a Project Labor Agreement with benefits, and apprenticeship.

On a more personal level I would like to bring the importance of our youth of tomorrow to the table. Our young men and women need the opportunity for a career in today's world. If projects like this are passed, they will have the opportunity to build a future and not wonder endlessly throughout society to where bad choices that could possibly destroy the good that this life has to offer. Family, children, and good paying jobs would be something to strive for. With opportunities for our youth that leave high school to enter a trades union and to start careers will help tremendously from keeping our youth from making those decisions to hang out and have bad influences that will lead them down a path of drugs and crime and homelessness. I strongly urge the passing of this project for all the right reasons. We must give the youth of tomorrow the opportunities to build a good life. Thank you for your time and attention to this matter. Have a wonderful day,

Sincerely,
Freddy Viszneki
