Mr. Drew Bohan
Executive Director
California Energy Commission
715 P Street
Sacramento, CA 95814

RE: Ava Community Energy 2026 Annual Load Management Standards Implementation Report

In accordance with California Code of Regulations, Title 20, Section 1623.1(a)(3)(C) (20 CCR § 1623.1(a)(3)(C)), Ava Community Energy respectfully submits this Annual Load Management Standards Implementation Report to the California Energy Commission ("CEC") Executive Director and to the CEC Docket Number 23-LMS-01.

If you have any questions, or if additional information is required, please contact Michael Quiroz at mquiroz@avaenergy.org.

Best,

Michael Quiroz
Senior Regulatory & Data Analyst
Ava Community Energy

Table 4 Ava’s Rates and Corresponding RINs	10

I. Introduction

California Code of Regulations (“CCR”), Title 20, § 1623.1(a)(3)(C), states that “[e]ach Large POU and Large CCA shall submit to the Executive Director annual reports demonstrating their implementation of plans approved pursuant to this subsection, as such plans may be revised pursuant to this subsection. The reports shall be submitted one year after plans are approved pursuant to subsection (2) and annually thereafter.” Ava’s compliance plan was approved by the CEC on August 13, 2025.¹

Pursuant to 20 CRR § 1623.1(a)(3)(C), Ava submits this annual report, titled “Ava Community Energy 2026 Annual Load Management Standards Report,” describing Ava’s implementation progress since approval of its Load Management Standards (“LMS”) Compliance Plan. This report is largely organized by the outline provided by California Energy Commission (“CEC”) staff in their March 24, 2026 “Compliance Assistance Memorandum for Submitting Load Management Standards Annual Reports,” available at the CEC LMS docket.²

In its compliance plan, Ava provided a compliance roadmap identifying deadlines for each LMS requirement.³ In Table 1 below, Ava provides a new version of this roadmap, with updated information regarding compliance with each requirement, to illustrate its progress in meeting LMS requirements. Ava has maintained full compliance with the Load Management Standards and continues to evaluate adoption of new dynamic rates. Ava has not materially deviated from the approved compliance plan.

Table 1: Updated Compliance Roadmap

LMS Section	Regulatory Requirement	Due Date	Status
§1623.1(c)	Within three months of regulation effective date, 4/1/2023, upload existing time-dependent rates to the MIDAS database. ²	8/1/2023	<u>Complete</u> Ava uploaded existing time-dependent rates to the MIDAS database.
§1623.1(a)(1)	Within one year of regulation effective date, develop and submit compliance plan addressing how Ava plans to comply with LMS requirements, including evaluation of marginal	4/1/2024	<u>Complete</u> Ava submitted an initial compliance plan on April 11, 2024 ⁴ and later submitted a revised plan ⁵

¹ *Signed Orders Approving LMS Compliance Plans for Ava, CPASC, LADWP and SMUD from the Aug 13, 2025 Business Meeting*, 23-LMS-01 (August 18, 2025).

² *Compliance Assistance Memorandum for Submitting Load Management Standards Annual Reports*, 23-LMS-01 (March 24, 2026).

³ *Clean Version of Ava Community Energy Revised Load Management Standards Compliance Plan*, 23-LMS-01 (July 18, 2025), pp. 7–9.

⁴ *Ava Community Energy Load Management Standards Compliance Plan*, 23-LMS-01 (April 11, 2024)

⁵ *Clean Version of Ava Community Energy Revised Load Management Standards Compliance Plan*, 23-LMS-01 (July 18, 2025).

	cost-based rates and programs, to Ava’s Board. The plan must be considered for adoption within 60 days after submission.		in response to a CEC request for revisions. ⁶ The revised plan was approved by the California Energy Commission on August 13, 2025. ⁷
§1623.1(a)(3)(A)	Submit compliance plan to the Executive Director on the CEC within 30 days of adoption of the plan. Respond to requests for additional information and/or recommendations within 90 days.	6/1/2024	
§1623(c)(4)	Within one year of regulation effective date, provide customers access to their Rate Identification Numbers (“RIN”) on billing statements and in online accounts using both text and QR.	4/1/2024	<u>Complete</u> All Ava customers began receiving RINs as required by §1623(c)(4).
§1623(c)(2)	Within 18 months of regulation effective date, develop and submit to the CEC, in conjunction with the other obligated utilities, a single statewide standard tool for authorized rate data access by third parties, and the terms and conditions for using the tool. Upon CEC approval, maintain and implement the tool.	10/1/2024	<u>Complete</u> Ava actively participated in the development of the Joint LSE Single Statewide Tool submission, docketed October 1, 2024. ⁸
§1623.1(b)(3)	Within 18 months of regulation effective date, submit to the CEC Executive Director a list of load flexibility programs deemed cost effective by Ava. The portfolio of programs must provide at least one option to automate response to MIDAS signals for each customer class where Ava’s Board has determined	10/1/2024	<u>Complete</u> Ava submitted a list of load flexibility programs to the CEC on October 10, 2024 ⁹

⁶ *Request for Revision Ava Energy Compliance Plan*, 23-LMS-01 (January 16, 2026).

⁷ *Signed Orders Approving LMS Compliance Plans for Ava, CPASC, LADWP and SMUD from the Aug 13, 2025 Business Meeting*, 23-LMS-01 (August 18, 2025).

⁸ *Single Statewide Tool Joint LMS LSEs Submission*, 23-LMS-01 (October 1, 2024); *Single Statewide Tool Joint LMS LSEs Concept Design Document*, 23-LMS-01 (October 1, 2024); *Single Statewide Tool Joint LMS LSEs Terms and Conditions for 3rd Party Access*, 23-LMS-01 (October 1, 2024).

⁹ *Ava Community Energy LMS Load Flexibility Programs List*, 23-LMS-01 (October 10, 2024).

	such a program would materially reduce peak demand.		
§1623.1(a)(3)(C)	Submit annual reports to the CEC Executive Director demonstrating implementation of plan.	Every year on August 13	<u>Ongoing</u>
§1623.1(b)(2)	Within 27 months of the regulation effective date, submit at least one marginal cost-based rate to Ava's Board for approval for any customer class(es) where such a rate will materially reduce peak load.	7/1/2025	<u>Complete</u> Ava satisfied this requirement by committing to participation in dynamic pricing pilots. ¹⁰
§1623.1(b)(4)	Within 51 months of the regulation effective date, offer customers voluntary participation in either a marginal cost-based rate, if approved by Ava's Board, or a cost-effective load flexibility program.	7/1/2027	<u>Ongoing</u> In its compliance plan, Ava deferred offering customers voluntary participation in dynamic rates, committing instead to participate in dynamic pricing pilots and use the results to re-evaluate dynamic rate implementation in the next triennial compliance plan update. ¹¹
§1623.1(b)(5)	Conduct a public information program to inform and educate affected customers why marginal cost-based rates or load flexibility programs and automation are needed, how they will be used, and how these rates and programs can save customers money.	Ongoing, dependent on offerings	<u>Ongoing</u> For the dynamic pricing pilots, Ava conducted outreach to commercial and industrial customers, reviewed and leveraged PG&E's educational materials, and developed a dedicated website page to provide program information. ¹²

¹⁰ *Notice of Ava Community Energy's Compliance with California Code of Regulations Title 20 § 1623_1(b)(2)*, 23-LMS-01 (July 1, 2025).

¹² *Hourly Flex Pricing*, avaenergy.org.

§1623.1(a)(1)(C)	Review the plan at least once every 3 years after the plan is adopted and submit a plan update to the Board if there is a material change.	Every 3 years on August 13	<u>Upcoming</u>
------------------	--	----------------------------	-----------------

II. Implementation status of rates or programs in the approved compliance plan

In January of 2024, the CPUC issued *Decision to Expand System Reliability Pilots of Pacific Gas and Electric Company and Southern California Edison Company* (“D.24-01-032”) ¹³ as part of Rulemaking (“R.”) 22-07-005. Decision (“D.”) 24-01-035 directed Pacific Gas and Electric Company (“PG&E”) and Southern California Edison Company (“SCE”) to “expand the demand flexibility pilots authorized in Decision 21-12-015 to provide summer reliability benefits.” ¹⁴ PG&E has since renamed these pilots to the “Hourly Flex Pricing Pilots.” There are two distinct Hourly Flex Pricing (“HFP”) Pilots: HFP Pilot 1, which serves agricultural customers, and HFP Pilot 2, which serves residential, small and medium commercial, and large commercial and industrial customers. The pilots have been offered to customers since Q4 2024 and are authorized to continue through December 31, 2027.

Separately, the CPUC approved Phase II of PG&E’s Vehicle-to-Grid Integration (“VGI”) pilots via Resolution E-5192 ¹⁵, per directives in *Decision Concerning Implementation of Senate Bill 676 and Vehicle-Grid Integration Strategies* (“D.20-12-029”) ¹⁶ as part of R.18-12-006. Phase II of the VGI Pilot seeks to test the effectiveness of unidirectional and bidirectional charging to optimize bills on dynamic pricing.

Ava is participating in both the HFP Pilots and VGI Pilots (collectively referred to as “dynamic pricing pilots”). As described in its LMS Compliance Plan, Ava plans to use dynamic pricing pilot results to re-evaluate dynamic rate implementation in the next triennial compliance plan update. Key details of these pilots are summarized below in Table 2.

¹³ *Decision to Expand System Reliability Pilots of Pacific Gas and Electric Company and Southern California Edison Company* (“D.24-01-032”), R.22-07-005 (January 25, 2024).

¹⁴ *Id.*, 2.

¹⁵ *Resolution E-5192. Pacific Gas and Electric Company Advice Letter 6259-E requests approval of four vehicle-grid integration pilots pursuant to Decision 20-12-029* (May 6, 2022).

¹⁶ *Decision Concerning Implementation of Senate Bill 676 and Vehicle-Grid Integration Strategies* (“D.20-12-029”), R.18-12-006 (December 17, 2020).

Table 2: Key Details of Dynamic Pricing Pilots

	VGI	HFP Pilot 1	HFP Pilot 2
Regulatory Authorization	E-5192	D.24-01-032	D.24-01-032
Eligibility	B6, B10, B19, B20, EVA2-A, E-ELEC, BEV-1, BEV-2	AG-A1, AG-A2, AG-B, AG-C	B-6, B-10, B-19, B-20, E-ELEC, EV-2A
Customer classes	Residential, Small Business, Medium Business, Large Commercial and Industrial (“C&I”), Business EV	Agricultural	Residential, Small Business, Medium Business, Large C&I
Ava enrollment (number of customers)	37	3	172
¹⁷ Enrollment (MW) ¹⁸	39.26	0.12	11.81

In the *2026 Annual Report on PG&E’s Load Management Standards Compliance Plan*, PG&E provided a table with comprehensive rate design details for the dynamic pricing pilots.¹⁹ Ava appreciates PG&E’s summary and reiterates this information in Table 3 below for convenience.

Table 3: Rate Design for Dynamic Pricing Pilots

RTP Feature	Pilot Rate Design
Marginal Energy Cost (“MEC”)	CAISO day ahead hourly price at the PG&E Default Load Aggregation Point (“DLAP”), plus a constant line loss factor
Marginal Generation Capacity Cost (“MGCC”)	A sigmoidal price curve based on the forecasted adjusted net CAISO load. Designed to collect the average MGCC value over the entire year.
Marginal Distribution Capacity Cost (“MDCC”)	A sigmoidal price curve based on the forecasted load of a representative circuit. Each of PG&E’s circuits is mapped to a cluster of circuits that have similar load profiles. A single circuit is chosen that best represents the collective load shape of the entire cluster. Designed to collect the average Primary MDCC value over the entire year. Other MDCC components are not time-varying and are not part of the dynamic RTP rate.

¹⁸ Per PG&E Advice Letter 7222-E, enrolled capacity is calculated as the customers’ maximum demand for the year before the customer enrolled in a pilot.

¹⁹ *2026 Annual Report on PG&E’s Load Management Standards Compliance Plan*, 23-LMS-01 (May 8, 2026), p. 10.

Non-Marginal Costs	Collected through subscription, a pre-set usage profile that is billed on a customer's otherwise applicable tariff ("OAT"). See Line 6 of this table below for more explanation on subscriptions.
Export Compensation	Equal to the dynamic MEC, MGCC, and MDCC values. Because the dynamic price is marginal only, the exports are valued at the same price as consumption. Exports covered by the subscription are compensated at the OAT.
Subscription Protection	Customers are given a predefined load profile, either based on their historical usage or a class average, which is charged at the customer's OAT. Only deviations from the assumed load profile (above or below) are charged or credited at the dynamic rate. Each month, the load profile may be scaled after the fact so that the total usage in the subscription profile matches the customer's actual usage
Billing Structure	Customers are shadow billed on the HFP rate. At the end of a 12 month "True-Up" period, the customer is given a credit if their performance on the HFP rate is better than their OAT rate. No extra charge is given to customers that perform worse on HFP (meaning their bill on the HFP rate is greater than their bill on the OAT rate)
Forward Transactions	Agricultural customers on HFP Pilot 1 have the opportunity to lock in prices for specific hours up to 7 days in advance

In October 2025, PG&E submitted supplemental testimony describing an updated approach to dynamic rate design and requesting authorization to extend the HFP Pilots beyond 2027 as a stop-gap measure to maintain RTP availability while longer-term implementation capabilities are developed.²⁰ In addition, the mid-term evaluation of California's dynamic pricing pilots was released in July 2026, providing new information on pilot performance and implementation considerations.²¹

Ava is monitoring these developments to assess their impact on compliance. Additionally, Ava is tracking the outcome of PG&E's HFP extension proposal and the CPUC's Billing Modernization Initiative proceeding. The Billing Modernization Initiative has direct implications for Community Choice Aggregators ("CCAs"), because PG&E serves as the meter data management agent and bill provider for CCA customers. PG&E's ability to provide CCAs with timely billing-quality hourly consumption data for all customers, which is necessary to support full implementation of dynamic rates, is contingent on completion of its billing system modernization. Similarly, PG&E's management of customer bill design and distribution determines whether and how dynamic rate information may be communicated to customers.

²⁰ *Pacific Gas and Electric Company 2023 General Rate Case Phase II Supplemental Testimony Exhibit (PG&E-5) Real-Time Pricing Proposal*, A.24-09-014 (October 29, 2025).

²¹ Dan Hansen, Corey Goodrich, *Mid-Term Evaluation of PG&E's Hourly Flex Pricing and Vehicle Grid Integration Pilots* (July 2026).

III. Time-varying rate submission to MIDAS

CCR, Title 20, § 1623.1(c) state that “each Large POU and each Large CCA shall upload its existing time-dependent rates applicable to its customers to the Commission's Market Informed Demand Automation Server (MIDAS) database. Each Large POU and Large CCA shall upload all time-dependent rates, including those approved after April 1, 2023, to MIDAS prior to the effective date of the time-dependent rates each time a time-dependent rate is approved by the rate-approving body and each time a time-dependent rate changes.”²²

On July 25, 2023, Ava completed the upload of all its base rates to MIDAS, totaling 102 RINs. A message confirming successful upload was returned for each rate file loaded to MIDAS. Ava sent an email to CEC staff confirming successful MIDAS upload on July 31, 2023, and received acknowledgement from the CEC’s MIDAS Lead the same day.

On October 1, 2023, Ava uploaded all remaining rate modifiers, such as PCIA vintage, associated with current time dependent rates. Ava notified CEC staff of the successful upload on October 1, 2023, and provided a spreadsheet tying RINs to rate modifier combinations upon request.

Ava’s rates are indexed to Pacific Gas & Electric rates, with a discount or premium being applied depending on whether a customer takes service on Bright Choice or Renewable 100, respectively.²³ As such, Ava rates change with every PG&E rate change, and new MIDAS uploads are required to account for these updates. Ava has continued to update MIDAS as rate values have changed. Ava has promptly identified and addressed missing information and updated processes as needed.

A list of RINs is available in Section V.

IV. RINs on customer billing statements

Ava customers receive a consolidated bill from PG&E. To support RIN provision, Ava works with its back-office service provider, the Sacramento Municipal Utility District (SMUD), to transmit customers' unbundled RINs to PG&E for inclusion on customer bills. All customer classes can view their RINs on their bills. Customers who scan the QR code on their bill will see their RIN displayed on-screen, while customers who do not use a smartphone can find their RIN printed directly below the QR code.

V. List of RINs

The following table contains a list of Ava’s rates and their corresponding RINs.

²² CCR, Title 20, § 1623.1(c).

²³ Bright Choice and Renewable 100 are the service plans available to Ava customers, differentiated by resource mix. More information available [here](#).
