Tire Regulations

First, you need to know I am a registered independent and not a conservative republican.

Your new rules for tires is absolutely going to be a problem for the majority of car owners in California. And if you don't think that reducing the availability or choices of tires by 70% is not a problem then you should resign from the board/commission immediately. I don't know who died and made you people God that you should limit our choices in life according to your personal interpretation of data. I have always bought all weather tires and they have served me very well. I also have a standard small spare that came with my car. Exactly what type of spare MUST we now purchase to appease you all. Will it fit where my spare is now or will it have to take up my trunk space. People like you are exactly why more people are leaving CA than arriving and why businesses are leaving. You are laser focused on your own priorities and rarely if ever truly consider the ramifications of your actions on the people of CA. This is a power trip for you all and then you hide behind climate change and energy efficiency. These types of decisions are what make people angry and expose climate change to doubt and misinformation. I always thought I would spend the rest of my life in CA but now I'm thinking maybe not.
