Potential Battery Plant

The residents of Vacaville continue to fight against Companies wanting to build Battery Storage plants in our City. The fact that this would even be an option considering the Agriculture and Cattle in this County is absurd. The history of the Battery Storage facilities says it all as it is not a matter of if but when. There is Farm land all around the proposed site and an Animal Sanctuary that is home to over 130 animals and Neighborhoods that people live in. When there is a fire and the Fumes make the animals sick or it gets into the water and makes animals sick who is going to pay the Vet bills for all the sick animals?? In addition who will reimburse the Farmers for the loss of crops due to water contamination. Who will pay for Medical bills when people get sick???? It also jeopardizes our home values!!!! There are so many places they can build these facilities that will not endanger people or animals why in the world are they even allowed to propose building them in Farmland or Residential areas! I hope we can all use some common sense when it comes to these facilities and build them where they can't cause harm to people or our agriculture!!!!

Thank you!!
