Corby Project

I am opposed to the Corby Project for several reasons, the main being the location of a lithium-ion battery energy storage system which is considered to contain hazardous material that is highly flammable within a mile of Kaiser Hospital, two major freeways and residential areas. This does not seem to be a prudent choice for such a project. I believe the California Energy Commission should disapprove this project at this location given the grave risk it poses to the community. I am sure the CEC is aware of how disastrous a run-away fire can be to both life and property.
