Docket Number: 26-ALT-01

Letter of Support Docket No 26-ALT-01 GFO-25-608 (EV HOME)

Dear California Energy Commission:

Climate Resolve is pleased to support East LA Community Corporation (ELACC) and its partners in their application for East Side EV HOME under California Energy Commission solicitation GFO-25-608.

Climate Resolve has worked for years with residents and community organizations in Boyle Heights and the greater East Los Angeles area to advance equitable climate solutions, cleaner air, community resilience, and meaningful public participation. Our work in Boyle Heights has included partnerships with Promesa Boyle Heights and ELACC, community organizing and outreach, environmental-justice education, and programs that help residents better understand and respond to local air pollution and climate impacts.

As priority communities under California's Community Air Protection Program, Boyle Heights and East Los Angeles bear heavy cumulative pollution burdens from freeways, freight, and industrial activity, making affordable access to clean transportation and energy essential. East Side EV HOME directly addresses this need through a trusted, community-centered model, and Climate Resolve is eager to collaborate with ELACC and its partners to leverage our local organizing, authentic engagement, and deep community relationships to connect Eastside residents with affordable electric vehicles and low-cost residential charging.

We are pleased to support this application and look forward to working together to ensure Eastside residents benefit directly from California's clean-energy and clean-transportation transition. If you would like to discuss this further, please contact me at Ehuerta@climateresolve.org.

Additional submitted attachment is included below.

Innovate. Advocate. Achieve. Together.
