State of California Office of Administrative Law

In re: California Energy Commission

Regulatory Action:

Title 20, California Code of Regulations

Adopt sections: Amend sections: 1240, 3201, 3202, 3203, 3204, 3206, 3207 Repeal sections: NOTICE OF APPROVAL OF REGULATORY ACTION

Government Code Section 11349.3

OAL Matter Number: 2016-0301-04

OAL Matter Type: Regular (S)

The California Energy Commission (CEC) in 2013 adopted regulations specifying procedures for enforcement of the Renewables Portfolio Standard (RPS) on local, publicly-owned electric utilities (POUs). The RPS was created to increase the amount of electricity generated from eligible renewable energy sources. Eligible sources generally mean: wind, solar, biomass, ocean wave, tidal current, landfill or digester gas, geothermal, and small hydroelectric. In this rulemaking CEC is amending this regulations due to the passage of Senate Bill 591 (SB 591, Stats. 2013, ch. 520) which added new subdivision (k) to Public Utilities Code section 399.30 which establishes a limited procurement exemption for a "local publicly owned electric utility that receives greater than 50 percent of its annual retail sales from its own hydroelectric generation that is not an eligible renewal energy resource." This rulemaking also adds some definitions and provides additional detail about dynamic transfers, the portfolio content category classification of electricity products from POU-owned resources, excess procurement rules related to amended contracts, optional compliance measures, reporting requirements and procedural provisions for complaints of noncompliance.

OAL approves this regulatory action pursuant to section 11349.3 of the Government Code. This regulatory action becomes effective on 4/12/2016.

Date: April 12, 2016
