Subject: July Panel Meeting

Associate Builders and Contractors Southern California Chapter Inc. (ABC) is a forty-year old contractor association dedicated to providing the highest quality training and education for our members and their employers. We are requesting assistance from you to have the National Lighting Contractors Association of America's (NLCAA) application reviewed for acceptance as an Acceptance Test Technician Certified Provider at next month's business meeting in order to help the state meet its goal of having over 300 certified Lighting Controls Acceptance Test Technicians by July 1, 2014.

NLCAA originally submitted their application in December, 2013 and as of today the application has not been approved. Having the NLCAA rapidly approved will help the more than 700 journeymen electricians employed by our members to be certified as rapidly as possible.

In order to have this training accomplished expeditiously, we are requesting that you help accelerate putting the NLCAA's application as an authorized training center on next month's meeting agenda. We have found the NLCAA to be extremely knowledgeable and that they have the resources necessary, at their three training locations throughout the state, to accomplish this state required training.

Please feel free to contact me if you have any questions or need any additional information.
