RBIDC - Letter of Opposition

I live less than two miles away from the proposed RBIDC and I cannot have this in my backyard. I am a disabled veteran with damaged hearing and tinnitus and the noise will disrupt my quality of life by exceeding conventional noise levels. I have a right to reasonable use, enjoyment and accommodation of my property. My private well is one of the over 800 in the area that runs on electricity. This data center will threaten my access to water by pulling more power from my local grid than what is safely allocated. It will also draw more water from a deeper aquifer, which will cause well interference and exacerbate the depression in the area which will cause a lot of wells to go dry and force a lot of us into a financial situation we cannot afford. We support the local military installation, this data center will cause aerial, visual, and RF interference and threaten the security posture of the installation. The air quality in my area is already bad enough from dust storms and high wind, the data center will produce a significant amount of CO₂, CO, Nitrous Oxides, and fine particulate matter. I vehemently and unapologetically OPPOSE the building of this data center for the benefit of myself and my community at large.
