Please listen to this community!

The residents of the area have continuously stated their concerns and opposition to this project. The California Energy Commission is a public entity that should be serving the best interest of the public, not a company. I won't pretend to be an expert in everything related to this project, because I am not. It's not my job to be. What I do know is the dangers these projects have already brought to other communities, and we do not want to become victims of the same disasters. My job is to come together with my fellow neighbors and protect what we care about and to protect each other and our environment. If the public does not want a project moving forward in their community, then do what is right for once and stop this project from moving forward. Anyone endorsing this and ignoring this community's opposition should be ashamed of themselves. What if it was your neighbors, your family and children, and your home that had the potential to be impacted? I truly don't believe you would be onboard if that was the case.
