Docket Number: 24-OPT-05

I oppose the Corby Battery Energy Storage System (BESS) Project (Docket No 24-OPT-05)

I oppose and am totally against the Corby Battery Energy Storage System (BESS) Project (Docket No. 24-OPT-05).

These lithium ion battery storage facilities are a fire/explosive hazard, highly toxic to the environment, bleed out dirty energy, a waste of tax payer dollars, a waste of good farm land and the building of this supports child slave labor for mining of the minerals. This is very likely being pushed through by the energy commission to help bokster the power grid for the coming data centers and warrantless surveillance grid that solano county is trying to build. I oppose this as well. If you vote yes to build these storage centers against the publics will then you are against the constitution and the people. You are public servants not our masters.
