Letter of Opposition

Additional submitted attachment is included below.

Good evening, Commissioners,

My name is Dee Cole. I am a homeowner and a member of this community. My family **home** is directly across the street from the proposed Corby project.

This is not simply an abstract project on a map. My home is directly across the street, and I am asking you, as the decision-makers, to consider the families who will have to live with the consequences of this decision long after tonight's meeting is over.

This is a rural agricultural community. It is where families live, where people have invested their savings, raised their children, and built their lives. Approving this project at this location would fundamentally change the character of our community and the way we feel about the place we call home.

My greatest concern is safety.

When there is a fire or another emergency, how will my family be notified? Who is responsible for evacuating our family and our livestock? What happens to our home, our well, our irrigation water, and our property if there is an off-site impact? And who determines when it is safe for us to return, if ever?

I am also concerned about the long-term impact on our quality of life. What level of noise will our families have to tolerate—not only during construction, but for years from cooling systems and other equipment?

We should not have to sacrifice the peace and quiet of our rural community because an industrial facility was placed next to our homes.

We have worked hard to build equity in our home. What protection or compensation will be available to the homeowners who bear the burden of decline in property value?

These are not hypothetical concerns for me—they are questions I may have to face of my own home

I understand that California needs energy storage. But supporting this technology does not mean that every location is appropriate.

I ask you to look beyond simply asking, “**Can this project be built here?**”
Ask the more important question: “**Is this the right place to build it?**”

I respectfully ask you to protect our families, our agricultural land, and our community by rejecting this location and requiring the project to be built at Lambie Industrial Park, where an industrial facility belongs.

Put yourselves in my shoes. Imagine that your home was directly across the street. **Would you be comfortable with this being your family's reality?**

Please do the right thing for our community. Build it at Lambie.

Thank you for listening. ~ Dee Cole & Family
