Objection to Corby Battery Energy Storage System Project in Vacaville

Dear CEC,

I am a resident in Vacaville. The proposed battery site is too close to a community where hospitals, schools, and residential areas are. There are risks for fire dangers and compromised air quality for those residing in the area. It can also drive home prices down which can also make it difficult for home owners to sell their properties. I love Vacaville and do not want to be in a community where our health and fire risk are in danger and not have issues with selling the house where hazardous batteries would be located, would you?
