More Questions for the CEC to address re the Corby Project

More Questions for the CEC to address re the Corby Project

It seems obvious to most of us that the only reason the Lambie Industrial Park site was ignored as a viable alternative to the Vacaville-Dixon site is the shorter access distance to the Vaca-Dixon PG&E relay station. It would be quicker and cheaper for NextEra and PG&E.

My asks are: Does that single benefit outweigh the risks to the community?

1. Request that the CEC complete a comprehensive comparison of the risks of each site relative to the number of people/residents /sensitive receptors involved at each location.

a. This would also include a comparison of the complexity of emergency plans for each location.

2. In lieu of "Conditions of Certification, COC," □ Actually consult with those individuals and agencies directly who will be responsible for implementing especially emergency plans and incorporate those ACTUAL PLANS and their reports into the next EIR Report. These include but are not limited to:

a. Dixon Fire Protection District

b. Highway Patrol

c. Kaiser Hospital administration

d. Vacaville Fire Dept.

(Do not substitute academic theory, computer models, and projection)

Solano residents need to know that actionable plans are in place and will protect the community BEFORE a project of this type is approved.

I look forward to your thorough research and discovery,

Sincerely,
Colleen Britton
