RE: RB Inyokern Data Center Project

To Whom It May Concern,

On behalf of McWhirter Steel, I would like to express our strong support for the proposed RB Inyokern Data Center Project in California.

As a structural steel fabrication and union erection company serving the Western United States, we recognize the significant economic and infrastructure value that projects of this scale can bring to the region. Data center developments create opportunities for long-term investment, skilled trade employment, local business growth, and improvements to supporting infrastructure.

We believe the RB Inyokern Data Center Project has the potential to become an important contributor to regional economic development while supporting the growing demand for technology infrastructure throughout California and the western United States.

McWhirter Steel supports responsible development that creates high-quality jobs, strengthens local economies, and encourages continued investment in American infrastructure and manufacturing.

We appreciate the opportunity to express our support for this project and look forward to the positive impact it may bring to the region.

Sincerely,

David McWhirter
President
McWhirter Steel
