Letter of Opposition to proposed Corby Project

Additional submitted attachment is included below.

Commissioners, my name is Darlene Conner I do not oppose the Corby project but I do oppose the project at this location.

Much of this proceeding necessarily involves technical language, megawatts, dispersion models, noise levels, groundwater analysis, transmission engineering and conditions of certification which is all above my head.

But behind all of those technical subjects are real people, my family. I'm just a Mom and Grandmother concerned for her family. This project will be across the road from my daughters property, we have multiple family functions there please do not place this project here.

People live around this project. They drive these roads. They work this land.

They sleep here at night, peacefully for now but not in the future if this facility is placed here.

When something goes wrong and it will, they cannot simply close a report and go home somewhere else.

They are home they will deal with the problems that will arise with this project we have witnessed this with Moss Landing and numerous other sites.

The benefits of this battery project will be distributed across the electrical grid but many of its burdens would be concentrated on one small rural community.

The imbalance matters when there is another choice.

We are not asking you to abandon battery storage.

We are asking you to put this industrial facility in an industrial location.

Lambie allows the energy-storage benefit to remain while reducing the conflict with homes, hospitals, farms and the rural landscape.

The people living beside Corby should not have to absorb unnecessary risks simply because this particular parcel was available to the developer.

I pray that you will open your hearts and minds as well as your consciences. These people are my family, what if they were yours?

Please choose the industrial location and assure my family's safety. Thank you
