Vacaville, CA

CED.
Docket Unit MS-4
Docket # 24-OPT-05

I am writing to express my opposition to the installation + functioning of the MEGA Lithium-Ion Battery Storage Facility which could become an environmental / human / watershed disaster.

WHERE will the massive amounts of water come from?

Who - as if I didn't already know - will see our local measures / bonds / city / county taxes raised considerably to pay for the infrastructure that the millionaire / billionaire "investor boys' club" will pass on to residents for their cash cow?

I would move if I could - but I cannot move, nor can we sell up - which we

would prefer to do now that
Vacaville, CA will likely also
suffer a reduction in our property
values - our homes -
our only "piggy banks"
in this economy - -
our soon-to-be-devalued
homes because of some greedy
powerful people willing to cash out
our investments, (28 years of a
30 year mortgage). Why can't we
go?? because my partner was
exposed to toxins in his work
environment and it took 20
years for those toxins - such as
WE will be having @ Corby pro-
ject in Dixon - Vacaville -
he is what is deemed (EOL)
it stands for End-of-Life cancer
so. No. I don't want "BESS"
Corby as my/our
neighbor.

my name is
DIANA GARD - Roseto
134 WARREN Dr
Vacaville, CA 95687

30. D. GARD ~~ROSETO~~
pls. consider what I am writing you.
It is immoral and actually cruel
to gamble w/ the health and future
health of - what 150 K inhabitants
of Dixon - Vacaville?

Why don't these "investors" need to
pony up 1 B in a "contingency
FUND" for FUTURE needed
mitigation of any damages,
health claims

fire department &
infrastructure NEEDS
that they will be creating?

Why not? They are willing to
put our health up for grabs ---
why not put some \$\$\$\$ \$

towards correcting anyone's
medical bills.??

It has cost ¹¹ actually millions of
dollars for my partner's CANCER
treatments, meds, chemo, hospital-
izations, It likely will have cut
some 5-6 years off of his life.

I swear on my mother's grave that
he was exposed to a mixture of
toxins in his job as a "garbo"
(garbage collector) He worked 20
years, 18 of them throwing CANS
not using the "ARM", people would
mix CLEANING products - and
such throwing bleach into their
metal cans... he has life-ending
CANCER -

This project could - in its possible
future "failure" or off-gassing
as the CEC + helpers called that
nightmare scenario. Releases
known toxins into the AIR !!!

we cannot sell now - you don't
leave your Cancer Doctors -
 He also has needed to be
 attended at no less than 6 BAY
 area hospitals.

Please - I am asking you -
 please do not make people go
 through what we are living
 through - these last 20+ months
 since Dec 2025 - with his terminal
 diagnosis, has sucked all of
 the joy from our lives.

Please - we need clean
 water, clean air, we need
 our children and grandchildren
 to live in a sustainable
 world ...

It is also inevitable that China,
 India or Germany will have
 engineers who will likely, in
 a few years, come up w/

Something Smaller, more
efficient, less costly, Less
dangerous - and the USA
will have by then 100's of
these eco-nightmare (40,3)
acres large MEGA facilities.

I am sick because, in my heart
I know this is a "done deal".
I know that I too will be
stuck here living within the
wind blowing whatever CRAP
BESS / Corby passes into my
lungs. my skin, my food, my
water. Do you know what they
told us at CEE Public Hearing Mtg
Last night? In the event of
OFF gassing or other "event" read
Fire/explosion. We should "shelter
in place". That's NOT a real
plan for anyone's long term safety.
