NO!!!! TO SEAHAWK BATTERY PROJECT @ MINTO RD

This project proposes approximately 245 lithium battery containers with a plan for a future expansion. I'm concerned about thermal runaway that can cause fires which can release hazardous and toxic gases. This is an agricultural land, and we in this county try to preserve the farmland and limit unnecessary conversion to non-agricultural uses. It is located near active farmland, waterways and natural resources. Construction, operation, and incidence from this project will have a long-term impact on the environment. Many technical reports were prepared by consultants hired by the project applicants. Independent Review is necessary to ensure agricultural environmental and it will provide objective evaluation. That hasn't happened yet! And of course, the noise and EMF electromagnetic field radiation. This will impact the health of the people living nearby, the environment and other animal species that live there. I am full heartedly opposed to this project. Please stand with the people of the Santa Cruz county.
