NO on Corby

As of today, Sept. 11, 2026â€”Removal of damaged batteries from the burned storage facility in Moss Landing is entering its final stages. Twenty months after the massive explosion/fire of the 300-megawatt system and the cleanup still continues. 55% of the 100,000 lithium batteries were destroyed or damaged.

The CEC can declare that these storage facilities are safe, but a quick search of the internet proves otherwise. This proposed lithium battery storage facility absolutely, positively does NOT belong at the proposed site. It is too close to an existing hospital, homes, ranches and water supplies. There are no existing fire mitigation strategies or specialized equipment to handle an explosion/fire. You are asking Vacaville citizens to assume ALL of the risk.

Please do the right thing and choose common sense above expediencyâ€”choose a more industrialized location.
