Oppose battery storage in Vacaville Ca

I am writing in opposition to the proposed battery storage in Vacaville. The Corby proposed site is a few miles from Kaiser Permanente Vacaville. If there is a fire or thermal runaway event that would put tremendous pressure on KP resources. The other immediate hospitals are located along Nut Tree Road. I live in Leisure Town which is a 55 and older Senior community. Many have disabilities or oxygen dependent. there is only one road out of the HOA community because many of the houses are built in cul de sacs so that will stymie the traffic if an emergency. I am worrisome enough when fire season is here. I remember the Richmond oil refinery which cause many days of serious pollution when it had a fire. Hundreds if not thousands flooded the small Er hospital for severe respiratory distress. They had outdoor clinics for a few days. It wasn't explained whether the officials met with the local hospitals to get their assessment of what resources they had on hand to deal with the deluge of people with respirator distress should the battery storage goes up in flames. I think the risks severely outweigh the benefits. As it only provides 4 hrs daily of energy to 20,000 homes which doesn't warrant catastrophic injury and permanent health issues to local residents. Ty for your attention
