Corby BESS Project Staff Assessment

With regard to the Executive Summary, "The SA also evaluates whether the construction and operation of the project would be consistent with all applicable local, state, and federal laws, ordinances, regulations, and standards (LORS)."

-Where is the written evaluation of Solano County Initiative Measure T?

What is/are the specific economic value/s to Vacaville City and Solano County residents living within a six-mile radius of the proposed Corby BESS project?

Decreased property value, insurance rate increases or cancellation are real concerns.

How and when will CEC staff address these possibilities?

It is my understanding the stored electricity will benefit San Francisco. It is my observation that Solano County would shoulder all of the risk from this project.

What evidence has been provided in the SA that the fire suppression system is capable of preventing or stopping cascading thermal runaway?
