Opposition to the Corby Project

Commissioners, I attended the forum in Vacaville and had submitted a card to speak. Unfortunately I had to leave, but was able to hear Mayor Carli and Supervisor Mashburn comments. I fully support their views and efforts in keeping the Corby BESS facility from moving forward. I live approximately one mile from the proposed site in the un-incorporated Vacaville/Dixon area. For the past 16 years we have had up to four generations living on the property. Currently there are three generations on the property. If the Corby project is approved my daughter and son-in-law will most definitely move out of the area taking our four grandchildren with them for safety reasons. This would crush my wife and I.

In your description of the project you noted that a newer - safer JF2 DC link manufactured by LGE - that no thermal events have occurred since January 12, 2026. Interesting - nothing occurred at the Moss Landing Bess for the first two years - but I note there have been four fires there after the initial 2 years. I thank you for this opportunity to comment. May we all enjoy living and being safe in our communities.
