Wildlife and farm animals

I am a retired veterinary technician and my concern is always on the animals. Of course I want my land safe for my grandchildren but I will always stand up for wildlife and farm animals. We need more research on long term impacts. I've already lost my mother to chemicals sprayed around farm land. Now I have a new worries. Corby says we need new energy and that is a truth but they never admit to the underlying negative aspects. They say if they leave they will dig 6 ft deep in the ground occupied by them and remove the toxic soil. Which tells me there is contamination. And I'm sure that isn't contained to just the land they occupy.
